

Wishwoodle
Talking Pen ✨

The Idea

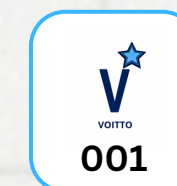

The Voitto Wishwoodle Talking Pen, Incorporates the modern teaching methods of interactive learning with audio visual learning at its core values. This innovative educational tool engages students in a multi-sensory experience, making lessons more dynamic and enjoyable. By integrating voice guidance and visual cues, the pen helps to reinforce key concepts and improve retention. Whether used for language learning, mathematics, science, or any other subject, the Voitto Wishwoodle Talking Pen adapts to various educational needs and learning styles.

The Voitto Wishwoodle Talking Pen is not just a writing instrument; it's a gateway to a world of knowledge and creativity, encouraging curiosity and empowering learners to reach their full potential.

The Future Of Learning

Voitto Wishwoodle enable the student and teachers to create a Smart Audio Book for learning with more interactivity.

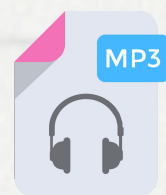

By utilizing the innovative 800 Programmable Stickers, users can record audio files of their choice, facilitating the transformation of traditional classics into interactive books. This technology has found significant application in the adaptation of revered Indian scriptures. A pioneering example of this integration is the Voitto Wishwoodle, which heralds a new phase in educational advancement. Leveraging the Wishwoodle technology proves instrumental in surmounting language barriers effortlessly, empowering users to record audio in any language of their preference.

Created by You

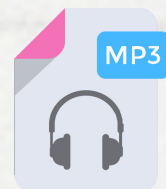

Connect to a computer, find the recordings in the DIYRECORD file, and share the recordings with as many people as you like.

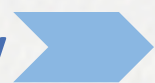

123.wav

Recordings under Students Mode

229_T.wav

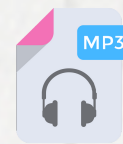

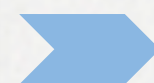

Recordings under Teachers Mode,
can't be changed under Students Mode

To get best performance, it is available to change the recordings any time, and only the last recording will be saved in the Wishwoodle Talking Pen.

If you have sound file (.mp3) and would like to use the sticker to read, just change the name into the No. of sticker, and save into the **DIYRECORD** file, when touching the sticker, you will hear what you have done.

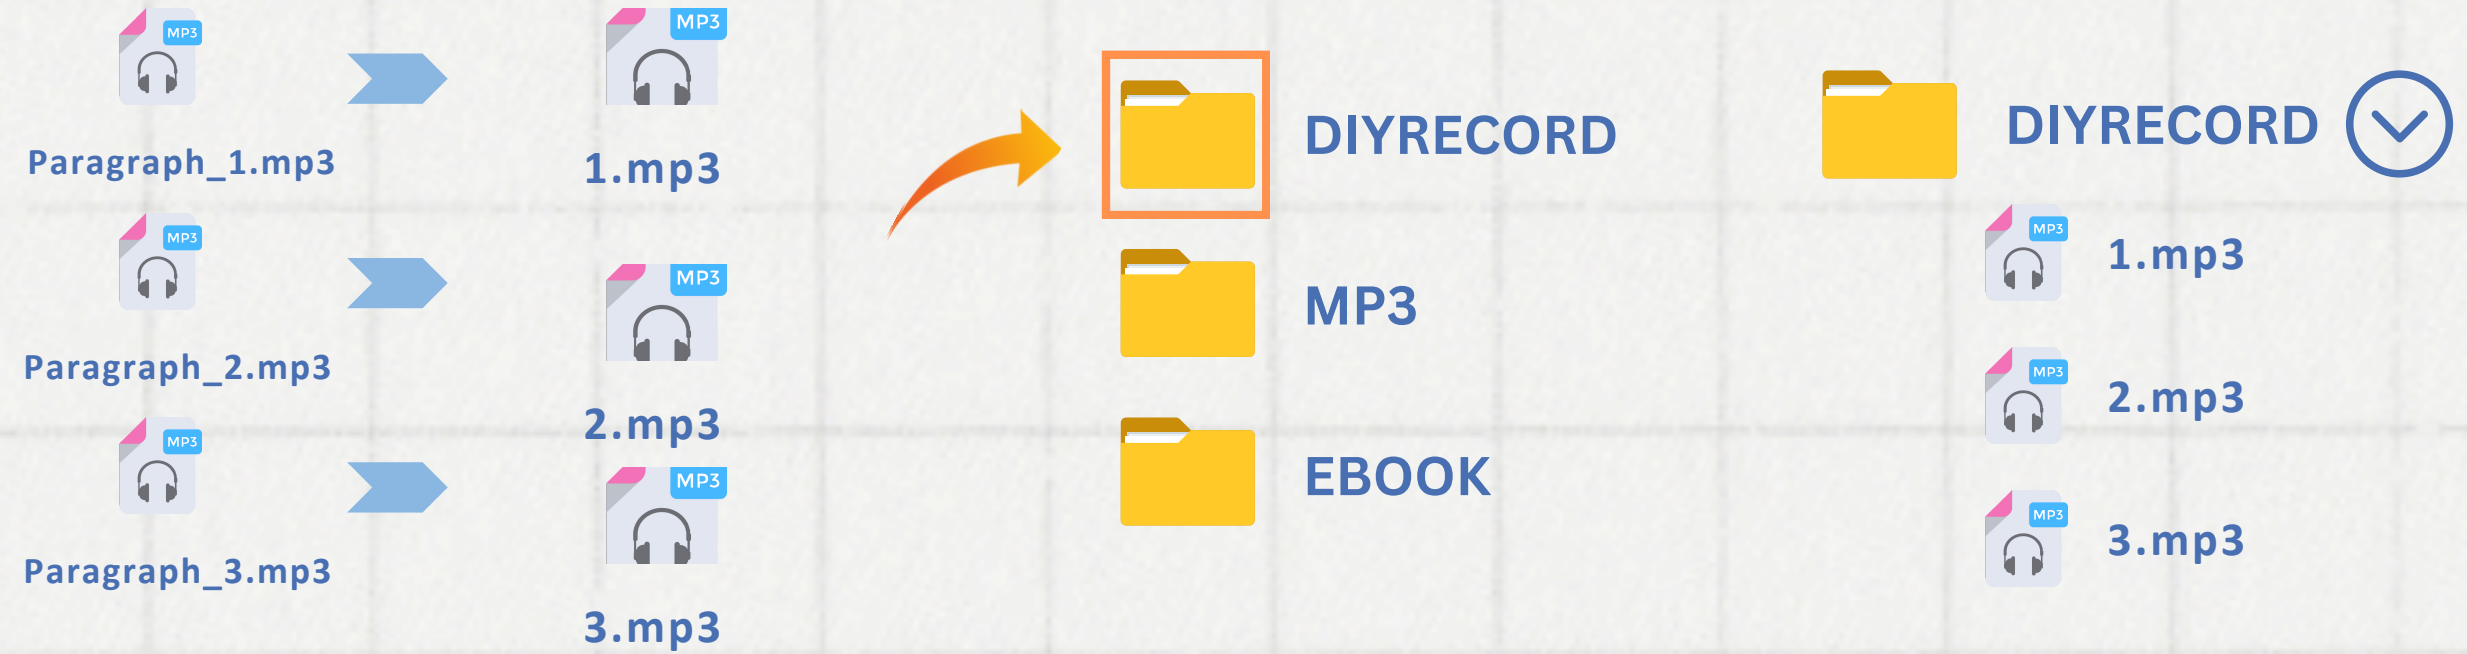

Sonet_Number_2.mp3

111.mp3

How to work with the recordable stickers:

- 1) Press record key to enter record mode
- 2) Choose a sticker
- 3) Start your recording after 3 tunes
- 4) Press record key to stop recording
- 5) Touch the stickers to read the recording
- 6) Try again when changing to new recording

Interface

Note:

A few inches from the mouth will be even better while recording. Each sticker can be recorded up to 5 minutes.

Press this button only to enter Students mode, means the kids can change the recordings by themselves, and the last recording will be stored in the pen only to save its memory.

Press these 2 buttons at the same time for 3 seconds to enter Teachers Mode recording, Just in case if the recordings are changed by thenaughty kids, just in case.

Interactivity By You

By turning ordinary objects into interactive learning experiences, you can ignite your child's curiosity and foster a lifelong love of learning.

For instance, take a simple rock from your backyard. You can teach your child about geology by discussing how rocks are formed, the different types of rocks, and even the process of erosion. Turn it into an art project by painting the rock together, encouraging creativity and fine motor skills.

Even a simple cardboard box can become a world of exploration. It can be transformed into a spaceship, a castle, or a puppet theatre, encouraging imaginative play and storytelling. Through these activities, children learn to think creatively, solve problems, and communicate effectively.

Technical Specifications
